PROFESSIONAL SUMMARY

Computer Science & Engineering student at LJ University with a strong focus on frontend development and hands-on experience building full-stack applications using React, Next.js, Django, and Node.js. Actively explores emerging technologies, including machine learning and cybersecurity, through independent projects, with proven ability to design and deploy interactive, secure web applications.

TECHNICAL SKILLS

Languages: Python, Java

Frontend: HTML, CSS, JavaScript (ES6+), Tailwind CSS, React, Framer Motion, Redux

Backend: Node.js, Express.js, Django, Flask

Data Science & ML: Machine Learning (Basics), Pandas, NumPy, Matplotlib

Databases: DBMS, SQL, MongoDB

Tools & Version Control: Git, GitHub

PROJECTS

ThreatLens-AI — AI-Powered Cyber Threat & Scam Detection Platform | [GitHub](#) | [Live Demo](#)

React.js, Vite, Tailwind CSS, Django REST Framework, Python, Machine Learning, Supabase, JWT

AI-powered cybersecurity platform designed to detect and classify potential scams and cyber threats from user-provided messages and online content.

- Engineered a multiclass threat detection pipeline to analyze suspicious content and categorize potential cybersecurity threats.
- Developed an interactive React dashboard and browser extension for real-time threat scanning and visualization of detection results.
- Secured Django REST APIs using Supabase JWT authentication, ensuring only authenticated users can access protected threat-scanning endpoints.

Finvest — Personal Finance Tracker | [GitHub](#) | [Live Demo](#)

React, Vite, Node.js, Express.js, MongoDB, Mongoose, JWT Authentication

Full-stack personal finance management platform for tracking transactions, budgets, loans, investment portfolios, and savings goals.

- Architected a decoupled full-stack application with a React + Vite frontend and a Node.js/Express REST API, implementing stateless JWT authentication with bcrypt password hashing.
- Designed MongoDB/Mongoose data models spanning transactions, budgets, loans, portfolio assets, and savings goals, each exposed through dedicated REST routes.
- Built a centralized error-handling system with an async wrapper, a custom AppError class, and Mongoose error parsing, plus process-level exception guards to keep the API resilient in production.

EDUCATION

Computer Science & Engineering

LJ University | Ahmedabad

2024 – 2028

LANGUAGES

English, Hindi, Gujarati
